RADIO SUMMER

What could you do with your own radio station?

What could we do with thousands of them?

www.RADIOSUMMER.org
Last year Prometheus Radio Project and our allies won a ten-year campaign to expand community radio stations across the country, including for the first time in big cities. Thousands of new licenses for community radio stations will soon be up for grabs!

Host an event in your community, distribute info, or go on tour to tell social justice groups about this historic opportunity. We will work with interested groups to apply for a station and get them on the air.

Prometheus and our allies offer you training, materials, and additional support to get the word out. Together, we can change the media landscape forever.
